Austin area · US work authorized · Available to start immediately

Ships full-stack products and AI agents fast, then stays with the customer from discovery through handoff.

SELECTED PROJECTS

Garage Sale — AI agent · Oct 2026

Built an agent that finds underpriced Facebook Marketplace listings, prices them against resale comps, and helps list and flip them. Co-won the Grok Bot Hackathon in Austin with team 9b on Oct 19, 2026. Attendees said they would pay $20 a month.

Live · GitHub

skill.supply — Full-stack agent · 2026

Built and deployed a Next.js 16 career agent from an empty repository in under two weeks, with structured Anthropic outputs, Zod validation, streamed state, and live inventory from 4 ATS APIs plus 6 aggregators.

Live · GitHub

summon.company — Agent reliability

Contributed 155 personal commits to a Paperclip-derived agent-company system, including an auditable register-truth reconciler and end-to-end evaluation. The real pipeline classified 12/12 known scenarios across 5 statuses, with 0 false auto-closes in 2 security or payment cases.

GitHub · Evaluation

EXPERIENCE

Anchor Marianas · Founder and Software Engineer — Oct 2024 to present · Remote

Sold and delivered software directly to clients, including Hilton, owning the work from discovery through implementation and production handoff.

EIGN · Software Engineer and B2B Sales — One-month trial, ended Dec 2025 · Remote

Built Lightmark.app's evidence-backed website diagnostic and worked across engineering, technical discovery, product demos, and outbound sales.

Guam Power Authority · Workflow Automation — 2024 · Guam

Automated a legacy Excel workflow from approximately 2 hours per run to approximately 2 minutes.

SKILLS

Product engineering	TypeScript, JavaScript, React, Next.js, Node.js, REST APIs, Zod, Python, Go
Agents and systems	Structured outputs, tool use, evaluations, human review, browser automation, CDP, Rust and wgpu debugging
