Adam Pang

Forward Deployed Engineer · Austin, TX · US work authorized · Available now
adamtpang@gmail.com · adampang.com · github.com/adamtpang · cal.com/adamtpang

I sit with the person who has the problem, find what is actually broken, and ship the **agent system** that fixes it, **end to end**. Co-won the Galatiq and SpaceXAI **Grok Bot Hackathon** with an agent built in **2.5 hours**.

EXPERIENCE

Quantus · Engineering Contributor, quantum-secure L1 — Apr 2026 to Oct 2026 · Remote and Singapore

- Found a **command injection** in the mining installer: config values were written unescaped into a file the installer sources, so a node name like $(command) would run. Patched it by validating every editable value, in a **19-file** PR with **44** passing tests. PR #14
- Root-caused a Windows **GPU miner crash** (out of memory): the miner saw **5** adapters for **2** physical GPUs. A maintainer confirmed it and shipped the fix. Issue #61, fix #67
- Built vc.fail: audits the **top 100** RootData VCs for quantum-related holdings; **28** have one. Built exchange.fail: post-quantum coin volume across CoinGecko exchanges.
- Worked on q.day for Quantum & Privacy Day, Tower Club Singapore, **Oct 8, 2026**. Merged **1** PR to the Quantus chain repo.

Anchor Marianas · Founder and Software Engineer — Oct 2024 to present · Remote

- Sold and delivered **client software**, including for **Hilton**. Owned each job from the **first conversation** to **production**.

EIGN · Software Engineer and B2B Sales — Dec 2025 · 1-month trial · Remote

- Built Lightmark.app's **website diagnostic**, which shows the evidence behind each result. Ran **technical discovery**, **demos** and **outbound sales**.

Guam Power Authority · Workflow Automation — 2024 · Guam

- Automated a legacy **Excel workflow** from about **2 hours** per run to about **2 minutes**.

PROJECTS

Garage Sale · github.com/adamtpang/grokbothackathon — Grok Bot agents · Oct 2026

- **Grok Bot agents** that scout underpriced Facebook Marketplace deals, price items against market, write the listing and draft buyer replies. A **human approves every step**. Built in **2.5 hours**, **50** commits.

summon.company · github.com/adamtpang/summon.company — Agent reliability · 2026

- **265** commits on a Paperclip-based **AI agent company**. Built a reconciler that checks agent records against the real repo. **Eval**: **12/12** scenarios across **5** statuses, **0** false auto-closes on **2** security and payment cases.

skill.supply · github.com/adamtpang/skill.supply — AI career agent · 2026

- Solo build, empty repo to **production** in under **2 weeks**, **77** commits. **Structured outputs** with Zod, streamed progress, live roles from **4** ATS APIs and **6** job aggregators.

ACHIEVEMENTS

- Co-won the **Grok Bot Hackathon** (SpaceXAI x Galatiq), Austin, **Oct 19, 2026**, with Garage Sale.
- **5,660** GitHub contributions since 2023, **5,033** in 2026, **362** pull requests. Source: github.com/adamtpang

SKILLS

Agents: Grok Bot, Anthropic and OpenAI APIs, **tool use**, **MCP**, **structured outputs**, **evals**, human approval loops, browser automation

Engineering: TypeScript, **React**, **Next.js**, Node.js, **Python**, FastAPI, Redis, Vercel, Rust debugging, Bash, PowerShell

Customer: Discovery, **demos**, B2B sales, scoping, shipping to **production**
